

Sequencing Seminar Series

Demystifying Next Generation Sequencing

Sequencing Simplified

Sequencing is transforming scientific discovery with combinations of key applications, enabling a deeper understanding of genome structure and function. Sequencing - by itself - is simply no longer enough. With the introduction of the Genome AnalyzerIIe and HiSeq™ 2000, Illumina provides an extensive portfolio of sequencing instruments designed to meet a wide range of applications and users' requirements. The industries most streamlined and intuitive single operator workflow just got easier. Preconfigured plug and play reagents and fully supported bioinformatics have made next generation sequencing accessible, simple and affordable.

Join us for this seminar series which will provide a step-by-step guide to next-generation sequencing.

THURSDAY, MAY 27th, 2010

MATRIX BUILDING
EXPLORATION THEATRETTE
LEVEL 4
30 BIOPOLIS STREET
SINGAPORE

SEMINAR SCHEDULE		
9:45	Registration	
10:00	Introduction	Ram Laxman, Regional Sales Manager, Illumina Singapore
10:05	Sample preparation considerations and workflow	Arjuna Kumarasuriyar, Product Marketing Manager, Illumina Australia
10:35	A Sequencer for Everyone - which instrument to sequence on and why	Ram Laxman, Regional Sales Manager, Illumina Singapore
11:05	Data Analysis Considerations	Siddharth Singh, Bioinformatics Scientist, Illumina Singapore
11:35	Transcriptomic Applications with Illumina Sequencing	Shawn Baker, Product Manager, Illumina USA
12:05	LUNCH	
1:00	Conclusion
