

illuminaDx™ Seminar Series

The Next Generation of Molecular Diagnostic Tests, Systems, and Services

Powered by the innovation that made us a leader in Life Sciences, IlluminaDx is dedicated to developing the next generation of molecular tests, systems and services that enable earlier diagnosis, selection of appropriate therapies and monitoring of disease progression. Our vision is to become a leader in translational medicine, focusing on complex diseases that benefit from high performance analysis, including genotyping, copy number, gene expression, methylation, and protein analysis.

In this seminar series, you will have the opportunity to learn how IlluminaDx is leveraging the strength of our technologies in four major areas:

- Molecular Diagnostics
- Molecular Cytogenetics
- Cancer Biomarker Discovery
- Clinical Laboratory Services

THURSDAY, MAY 27, 2010

THE MaRS CENTRE – SOUTH TOWER
101 COLLEGE STREET, SUITE 100
TORONTO, ON M5G 1L7
CONFERENCE ROOM 3

SEMINAR SCHEDULE

9:00	Registration	
9:30	Introduction	Emily Winn-Deen, VP of Product Development of Diagnostics, Illumina
9:45	Maximizing the Multiplexing Capabilities of the BeadXpress Reader for Infectious Disease Testing	Gianluca Roma, Illumina
10:00	Pharmacogenetics Research Standardized: The ADME Core List and VeraCode ADME Core Panel	Michael Phillips, Ph.D., Montreal Heart Institute Pharmacogenomics Centre
10:30	Identifying Chromosomal Abnormalities Using Infinium SNP Beadchips	Harper VanSteenhouse, Ph.D., Illumina
10:45	Molecular Cytogenetics Talk	TBD
11:15	Clinical Genome Sequencing Service	Julianne O'Daniel, Illumina
12:00	Lunch	
1:00	A Platform Approach to Translational Cancer Discovery and Diagnostic Development	Naomi O'Grady, Illumina
1:45	Conclusion
