

The Next Generation of Molecular Diagnostic Tests, Systems, and Services

Powered by the innovation that made us a leader in Life Sciences, IlluminaDx is dedicated to developing the next generation of molecular tests, systems and services that enable earlier diagnosis, selection of appropriate therapies and monitoring of disease progression. Our vision is to become a leader in translational medicine, focusing on complex diseases that benefit from high performance analysis, including genotyping, copy number, gene expression, methylation, and protein analysis.

In this seminar series, you will have the opportunity to learn how IlluminaDx is leveraging the strength of our technologies in four major areas:

- Molecular Diagnostics
- Molecular Cytogenetics
- Cancer Biomarker Discovery
- Clinical Laboratory Services

WEDNESDAY, AUGUST 11, 2010

MISSION BAY CONFERENCE CENTER
1675 OWENS STREET, SUITE 251
SAN FRANCISCO, CA 94143
ROBERTSON AUDITORIUM 2

SEMINAR SCHEDULE

9:00	Registration	
9:30	Introduction	
9:45	The BeadXpress System: An Array of Applications for the Molecular Lab	Gianluca Roma, Illumina
10:30	Identifying Chromosomal Abnormalities Using Infinium SNP BeadChips	Harper VanSteenhouse, Ph.D., Illumina
10:45	SNP Arrays in the Cytogenetics Laboratory	Laura Conlin, Ph.D., Children's Hospital of Philadelphia
11:15	Clinical Genome Sequencing Service	Mickie Henshall, Illumina
11:45	Lunch	
12:45	A Platform Approach to Translational Cancer Discovery and Diagnostic Development	Joanne Yeakley, Ph.D., Illumina
1:15	Closing Remarks
