Sudden Cardiac Arrest (SCA) is one of the leading causes of non-traumatic mortality in the US\textsuperscript{2,3}

- \textbf{25\%} of SCA is related to \textit{inherited cardiac conditions (ICCs)}\textsuperscript{2,3}

- \textbf{50\%} of SCA is related to ICCs in people \textit{under 35 years of age}\textsuperscript{2,3}

- \textbf{100,000} people per year die of SCA due to ICCs—approximately the same amount of people who die from Alzheimer’s disease\textsuperscript{2,3}

- \textbf{70\%} of causal variants in genes related to ICCs\textsuperscript{4}
